Case Study: AI-Powered Modernization for Global Healthcare Compliance Training

Client Background

Industry: Global Healthcare Provider Network
Employees: 12,000 worldwide
Challenge: Outdated SCORM clinical compliance training, inconsistent regulatory alignment, and accessibility limitations impacting workforce readiness

The Challenge

The client's legacy SCORM-based HIPAA, Infection Control, and Patient Safety training was:
• Over 5 years old
• Non-compliant with modern accessibility standards (WCAG)
• Inaccessible for mobile-first healthcare workers
• Delivering low engagement and completion rates

Our Solution

We modernized 6 high-priority clinical compliance modules using AI-powered content transformation:

• Extracted outdated materials and restructured with AI tools
• Converted to mobile-responsive, xAPI-compliant formats
• Ensured full WCAG accessibility for global learners
• Created multilingual AI voiceover versions for 10 regions
• Added interactive scenarios for infection control decision-making

Results & Impact

• 52% reduction in update time and training costs
• 61% improvement in course completions and engagement
• Training accessible in 10 languages within 4 weeks
• Enhanced regulatory readiness with audit-friendly xAPI reporting

Client Feedback

"Intraintel's AI-driven modernization made our global healthcare compliance training faster, more inclusive, and audit-ready—without costly rebuilds."
