AI-Powered Legacy eLearning Modernization

Modern learners expect accessible, engaging, and compliant content—yet most organizations are burdened with outdated SCORM-based courses that are costly to update and incompatible with modern LMS platforms.

Our Solution

Intraintel helps corporate L&D teams modernize legacy eLearning content using AI-powered tools and instructional design expertise. We convert static SCORM libraries into interactive, mobile-friendly, and compliance-ready learning experiences—faster and more affordably than traditional methods.

Key Benefits

✅ Cut content update costs by up to 60%

✅ Boost learner engagement by 50–70%

✅ Ensure WCAG accessibility and global localization

✅ Seamless SCORM to xAPI or cmi5 conversion

✅ Faster rollout for compliance and onboarding programs

Our Services Include:

• AI-Powered Content Modernization

• Interactive Microlearning & Scenario Redesign

• Compliance Training Revamp

• Multilingual AI Voiceover & Video Generation

• LMS Migration & xAPI Integration

• Learning Analytics & Performance Dashboards

Discover how we can transform your legacy content.
