

## Case Study: AI-Powered Modernization for Global Compliance Training

### Client Background

Industry: Pharmaceutical Manufacturing

Employees: 8,500 worldwide

Challenge: Outdated SCORM compliance modules, low engagement, and accessibility gaps impacting regulatory readiness

### The Challenge

The client's legacy SCORM-based GMP and Safety training was:

- Over 7 years old
- Non-responsive on mobile devices
- Generating poor learner engagement and low course completion rates

## Our Solution

We modernized 5 critical compliance modules using our AI-powered approach:

- Extracted and restructured content with AI tools
- Converted courses to mobile-friendly, xAPI-compliant formats
- Generated multilingual versions with AI voiceover and localization
- Integrated microlearning and scenario-based engagement features

## Results & Impact

- 58% reduction in content update time and costs
- 63% improvement in course completion rates
- Training delivered in 7 languages within 4 weeks
- Improved audit readiness with trackable xAPI data

## Client Feedback

"Intraintel's AI-powered modernization cut our compliance training update costs nearly in half while boosting learner engagement. We're now confident our global teams meet regulatory standards quickly and effectively."
