

Case Study: AI-Powered Modernization for Global Technology Training

Case Study

Modernization of global technology training programs

The image is a case study infographic for 'Modernization of global technology training programs'. It features a dark blue background with white and light blue text and graphics. At the top left, the title 'Case Study' is followed by 'Modernization of global technology training programs'. Below this is a paragraph of text, though it is mostly illegible. The infographic is divided into several sections: 'Modernization' with a circular diagram showing percentages (23%, 28%, 2%, 36%, 147%, 89%) and icons for 'Students' and 'Students Learning'; 'Student Engagement' with a line graph showing an increase from 2018 to 2021 and a pie chart for '45%'; 'Challenges' with a pie chart for '27%' and a list of items; 'Solutions' with a line graph showing an increase from 2018 to 2021 and a list of items; and 'Challenges' with a list of items. The bottom right features an illustration of two people working on a computer. The 'KANCER' logo is in the top right corner.

Client Background

Industry: Technology – SaaS & Cloud Solutions

Employees: 9,000 worldwide

Challenge: Outdated SCORM product and compliance training, low scalability, poor mobile access across global teams.

The Challenge

Outdated SCORM product and compliance training, low scalability, poor mobile access across global teams.

Our Solution

- Extracted legacy modules with AI
- Rebuilt as mobile-first, xAPI content
- Added multilingual AI voiceovers
- Integrated interactive product scenarios

Results & Impact

- 57% faster training updates
- 65% improvement in learner engagement
- Courses localized in 12 languages
- Enhanced tracking and analytics via xAPI

Client Feedback

"Intraintel's modernization helped us scale global product and compliance training fast—without increasing development costs."

Discover how we can transform your legacy training for global compliance in the finance sector.
