# Workflow: Modernizing Audio-Based Training

Step-by-step workflow to modernize this content type using AI tools:

1. Transcribe audio using Whisper or Descript.

2. Summarize with AI and identify key learning points.

3. Convert to dialogue-driven simulations or visual modules.

4. Add voiceover with ElevenLabs or Murf.ai.

5. Package into LMS-compatible format.

6. Test with target learners and refine.
