

Workflow: Modernizing SCORM-Based Compliance Courses

Step-by-step workflow to modernize this content type using AI tools:

1. Audit SCORM package to assess content structure and regulation alignment.
2. Extract textual and media content using SCORM tools or unpack software.
3. Use AI (e.g., ChatGPT, Claude) to update compliance language and summarize.
4. Check for accessibility gaps and apply WCAG using tools like WAVE or axe.
5. Convert to xAPI/cmi5 using tools like Articulate Rise or iSpring.
6. Test course in modern LMS for SCORM/xAPI compliance and tracking.
7. Deploy updated content and monitor learner data.
