# Workflow: Modernizing Video-Based Trainings (Long-form)

Step-by-step workflow to modernize this content type using AI tools:

1. Use AI (Descript, Wisecut) to transcribe and segment videos.

2. Summarize and chunk into microlearning with AI tools.

3. Add AI voiceovers, subtitles, and quizzes.

4. Rebuild into structured learning modules with navigation.

5. Translate/localize using Unbabel or DeepL.

6. Deploy on LMS with video tracking analytics.
