Workflow: Modernizing Web-Based Flash Modules
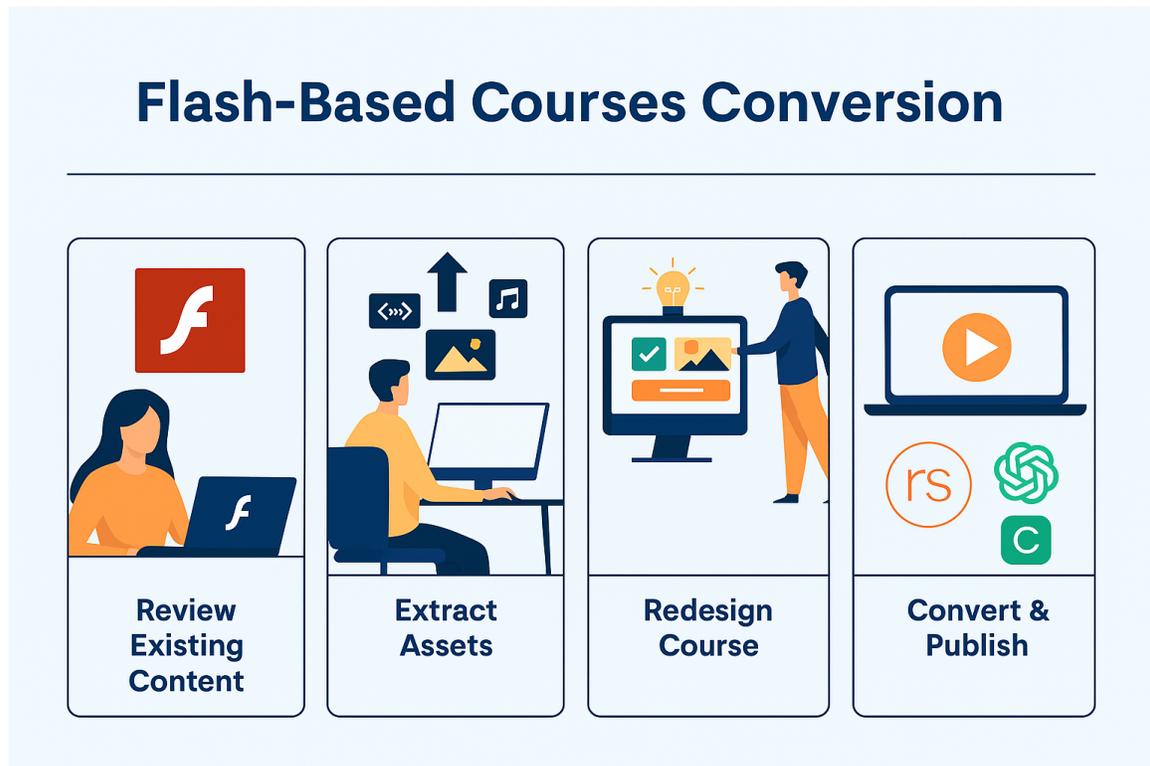

Step-by-step workflow to modernize this content type using AI tools:

Flash-Based Courses Conversion

Review Existing Content | Extract Assets | Redesign Course | Convert & Publish

1. Extract content and media from outdated Flash files.

2. Use AI to rewrite or condense textual components.

3. Rebuild in HTML5/xAPI using Rise360, iSpring, or Lectora.

4. Ensure mobile responsiveness and accessibility compliance.

5. Translate if needed using DeepL or Lokalise.

6. Deploy to LMS with compatibility testing.
